

RESIDENTIAL ROOM ADDITION SUBMITTAL REQUIREMENTS

1.1	PLOT/SITE/GRADING PLANS (Two 8-1/2" x 11" plot plans required).		(4) Sections and details.
	A. Legal description of plot or lot.		☐ (5) Material specifications and foundation notes.
	B. Property lines or boundaries with dimensions shall be clearly identified.		C. Framing Plans and Details:□ (1) Roof and floor framing plans showing
	C. Show all easements, right-of-ways, and street names.		location and spacing of trusses, joists and rafters, beams, headers, posts, trimmers, king studs, exterior and interior bearing walls, framing hardware, connections and details.
	D. Show location of all proposed and existing buildings. Dimensioned setbacks and building use shall be identified.		(2) Lateral force resisting system including shear walls, rigid frames, cantilevered columns, drag struts, collectors, diaphragm, nailing schedule, hold-downs, framing hardware and connections.
	E. Show septic tank, leach field, and well locations.		☐ (3) Structural details depicting explicit and
	F. Two Soil Reports for habitable remodels or additions of 600 square foot or greater.		complete load path and shear transfer details from point of load application to vertical and lateral load resisting elements.
1.2	BUILDING PLANS:		☐ (4) When trusses are to be used, framing layouts
	A. Plans shall be complete and shall consist of architectural, structural, electrical, plumbing and mechanical drawings, and supportive data.		and connection details are to be included. Truss design and shop drawings prepared, stamped and signed by a Nevada licensed engineer must be submitted prior to permit issuance. Truss fabricator must be included in the
	B. Plans must be drawn by a Nevada State Registered Architect or Engineer. The architect and/or engineer is responsible for the design and shall date, stamp, and sign each sheet submitted. Plans may also be drawn by a Nevada State Licensed Contractor or owner/builder when used for his own work.		current Clark County listing of approved truss fabricators. D. General structural notes, material specifications, loading and structural design criteria are to be included with the plans.
1.3		1.4	FLOOR PLANS:
	STRUCTURAL PLANS AND DOCUMENTS, including but not limited to:		A. Names of rooms and spaces with complete dimensions.
	A. Submit two sets of structural calculations, specifications, soils report, and other documents as		B. Sizes and types of doors and windows.
	required. Each set of documents shall be stamped, signed and dated by the licensed engineer who has responsible	1.5	EXTERIOR ELEVATIONS:
	charge of these documents. B. Foundation:		A. Wall coverings shall be specified by components, thickness, and material specification.
	☐ (1) Foundation plan showing all footings, posts, bearing walls, slabs, basement walls, stem walls, anchor bolts and spacing, hold-downs.		B. One-coat stucco systems require an approved applicator. Owner/builders cannot use these systems.
	botto una opubling, nota downs.		C. Roofing shall be specified by its type, manufacturer's name, and the product name.
	☐ (2) Size, depth and reinforcement of foundation.		manaracturer 3 name, and the product name.
	☐ (3) Post-tensioned slab foundation where required.		

1.0	MISCELLANEOUS DETAILS:	Ц	C. Exhaust faits Size, type, and location.
	A. Construction features such as stairs, fireplaces, showers, sunken tubs, etc. shall be detailed on the plans.		D. Dryer vent location.
	B. The location and size of readily accessible attic access scuttles and attic ventilation shall be shown on the plans with all necessary calculations.		E. Attic mounted/roof mounted equipment to show method of support and engineering calculations if required. Access and a platform are to be detailed when a roof pitch exceeds 4:12.
	C. Attic ventilation must be shown.	1.9	PLUMBING PLAN REQUIREMENTS:
	D. For room additions and remodeling of existing buildings, including mobile homes and manufactured buildings, provide plans and details of adjacent areas and connections for structural and weather resistive information.		A. Location, size and material specification of all water and DVW piping to be shown on the plumbing floor plan. Fixture types to be indicted with appropriate symbols. Individual fixtures and fixture groups may have pipe sizes indicated in a fixture schedule. Provide water supply fixture count with required meter size. UPC 6-5.
	E. When basements are installed, provide a cross sectional detail showing materials used, water proofing of exterior side and egress window wells.		B. Location and size of gas piping with Btu/h demands and pipe lengths.
1.7	ELECTRICAL PLAN REQUIREMENTS:		C. Location, type and size of water heater. Detail combustion air requirements if gas.
	A. For additions or alterations to electrical systems, provide the following:		D. Location and size of cleanouts to be shown.
	☐ (1) Plan of original structure showing areas being added or altered.	1.10	ADDITIONS OR ALTERATIONS TO PLUMBING/MECHANICAL:
	☐ (2) Size and location of existing and proposed electrical service and subpanels. Provide service and calculations to include the old and new loads. Load		A. Plan view of existing piping to appliance/fixtures together with point of connection and new system.
	calculations not required if adding seven or less devices.		B. BTU demand and distance of existing gas appliances to meter is required.
	\square (3) Identify the names or uses of the new areas (bedrooms, porch, etc.).	1.11	INTERNATIONAL ENERGY CONSERVATION CODE:
	☐ (4) New outlets, switches, light fixtures, smoke detectors, and special outlets.		A. Provide International Energy Conservation Code calculations on the City of Las Vegas forms. Include a
1.8	MECHANICAL PLAN REQUIREMENTS:		completed Residential Energy Schedule. Window values should be taken from manufacturer's NFRC label
	A. Heating/Cooling unit capacity, location, and working space for the following equipment:		information. For windows without NFRC labels, use the listed default values.
	☐ (1) Evaporative cooler Number of Horse Power.		B. System Analysis: "Designed and stamped/signed by a State of Nevada licensed architect or engineer.
	☐ (2) Heat Pump tonnage and KW strip.		C. *Component performance
	☐ (3) Electrical AC/furnace total KW demand.	Ш	D. *Prescriptive requirements
	,		* No signature or stamp required
	☐ (4) Gas furnace BTU demand or input. Note: Access and working space must be provided for all concealed equipment.		SEE ALSO: SINGLE FAMILY DWELLINGS SUPPLYMENTAL PROJUMENTS
	B. Type of duct work to be used.		SUBMITTAL REQUIREMENTS ENERGY CODE REQUIREMENTS
	☐ (1) Duct insulation information.
